Disclaimer

- ▶ THIS IS NOT AN OFFICIAL UNIVERSITY OF SUSSEX TEMPLATE.
- ▶ Adapted from the $\text{\LaTeX}$ template by Guanyang Xue (itself modified from Alex Pacheco's).
- ▶ Follows the [University of Sussex Identity Guidelines](#) V.2 (February 2026).
- ▶ Modify if you have suggestions to improve it and pass on the modifications so that anyone interested in using $\text{\LaTeX}$ for presentations could benefit.
- ▶ Typing equations with *physics* package is always more convenient.

$$\frac{\partial \mathbf{U}}{\partial t} + (\mathbf{U} \cdot \nabla) \mathbf{U} - \nu \nabla^2 \mathbf{U} = -\frac{1}{\rho} \nabla p + \mathbf{g}$$

How to

How to use it

How to install it to your path

- ▶ Place the contents within your TEXINPUTS path. On Linux, modify the TEXINPUTS variable to point to the directory where these files exist.
- ▶ For example: `export TEXINPUTS=${HOME}/LaTeX//:${TEXINPUTS}`
- ▶ On MacTeX, you need to install it to `${HOME}/Library/texmf/tex/latex/sussexdark`
- ▶ If you have admin permission copy it to your T_EX tree to the directory where the other beamer themes are located e.g.
`/usr/share/texmf-texlive/tex/latex/beamer/themes`
- ▶ To use the theme, add the command `\usetheme{sussexdark}` to the preamble of your document.
- ▶ Compile using `pdflatex` to get the pdf file.
- ▶ Feel free to modify the theme to suit your needs.

How to use it

How to use blocks

This is a block

```
\usepackage{listings}  
...  
\begin{frame}[c,fragile] % Use fragile option
```

This is an example block

```
import numpy as np  
a = np.array([1, 2, 3])
```

This is an alert block

```
fatal error: mpi.h: No such file or directory  
compilation terminated.
```
